SHORT PROJECT DESCRIPTION
Interstate 94 - Eckelson to Oakes - east bound

PRINTING INSTRUCTIONS
This CD includes the design plans in two different versions. File
IM-2-094(070)275_Preliminary_Black.exe is the plans in black and white and file
IM-2-094(070)275_Preliminary_Color.exe is the plans in color.

File IM-2-094(070)275_Preliminary_Black.exe should be used in order to create a high
quality black and white paper set of plans.
#####

If the color version is used to print a black and white set of paper plans, the
visual quality of the plans may be unacceptable.

Double click on the file you would like to view. The Digital InterPlot Viewer will
open the file automatically. You will see a list of folders and files on the left
side of your screen. To view a plan sheet, just click on the sheet and you will see
the view of that plan sheet in the right side of the screen.

Before you print, change your page setup to landscape view and 11x17 paper size. You
can print one sheet by highlighting the sheet and selecting File > Plot.

To print the entire set of plans or one section of the plans, just highlight that
folder (on the left side of the screen) and select File > Plot or right click on the
folder and select Print Folder.

For additional printing, see the guidance "Plot Commands" within the "View Portable
Plan Set" > "Help" pull down for addition printing instructions.

MEMORANDUM

TO: All Prospective Bidders

FROM: North Dakota Department of Transportation

DATE:

SUBJECT: Instructions for Viewing CD (Portable Plan Set) and Printing Plan Sheets

The plans for this project are enclosed on compact disc for bidding purposes. The plans are in a Digital InterPlot format and the Portable Plan Set file contains digital plots and the software application needed to view and print them.

Digital InterPlot is a software for creating and distributing electronic plots and their attributes in one file without the need of an internet connection.

Instructions for viewing CD:

1. Place CD in CD-ROM Drive.
2. Open **My Computer**, and find the CD-ROM Drive.
3. Click once on CD-ROM Drive and you will see two executable files. One file contains the plan sheets in color, and the other file contains the project plan sheets in black and white.
4. Double click on the file you would like to view. The Digital InterPlot Viewer will open the file automatically. You will see a list of folders and files on the left side of your screen. To view a plan sheet, just click on the sheet and you will see the view of that plan sheet in the right side of the screen.
5. Before you print, change your page setup to landscape view and 11x17 paper size. You can print one sheet by highlighting the sheet and selecting **File > Plot**.
6. To print the entire set of plans or one section of the plans, just highlight that folder (on the left side of the screen) and select **File > Plot** or right click on the folder and select **Print Folder**.

NOTE: It is recommended to print from the file with the black and white plan sheets.
